

Reduce Winter Feeding with Stockpiled Forage and Winter Pasture

Friday, August 23, 2024

Texas A&M AgriLife Research and Extension Center
1710 N. Hwy 3053, Overton, TX 75684

Would you prefer to feed hay for 60 days? 100 days? or 150 days?
Here's an opportunity to learn how to significantly reduce your hay feeding needs.

Stockpiled forages and winter pasture can be excellent options to significantly reduce winter feeding costs
and develop replacement heifers.

Program presented by:

Drs. Vanessa Corriher-Olson and Jason Banta

Topics include:

- Stockpiled forage: management and utilization
- Acres needed per cow for stockpiled forage and winter pasture
- Cool-season forages and variety selection
- Establishment and fertilization
- Monthly and seasonal forage production potential
- Appropriate mineral supplementation
- Estimated costs

Register by August 13th at 1:00 PM: \$60/person
Register before August 21 at 1:00 PM: \$75/person

- Includes lunch and program materials

9:30 Program starts
12:00 Lunch served
4:30 Adjourn

Register online at: <https://agriliferegister.tamu.edu/ansc-ev-051>
